

# Side Sewer As-Built Class

## LEARN TO:

- Prepare as-built documents for repairs, alterations, and new construction
- Locate detention and infiltration facilities
- Locate a cluster of appurtenances using one callout

**DATE:** Thurs, Aug 14, 2003

**TIME:** 2 p.m.

## LOCATION:

Key Tower  
40<sup>th</sup> Floor, Rm 4050  
700 Fifth Avenue  
Seattle, WA

## TO REGISTER, CONTACT:

DCLU Site Desk  
Phone: (206) 684-8860  
Fax: (206) 233-7902

Plan now to attend the DCLU Side Sewer As-Built Class. Hosted by senior site inspectors Rosalind Liston-Riggs and Roger Moore, this offering will help you learn how to quickly delineate the necessary information for side sewer as-built onto the Side Sewer Map Template.

You will be introduced to using black lines identified with red or blue circle callouts, showing a group of fixtures utilizing only one identifier and using a minimum of dimensions to establish locations. Discover when to use the street manholes or building locations for locating the side sewer repair, alterations or new construction both on- and off-site.

**NOTE:** This will be the last class hosted by DCLU this year.
